HACKTHEBOX

CRISIS CONTROL

Operation Secure Vote

Entity

United States of Luminthia (USL)	Host Nation
Hack The Box Security Services (HTBSS)	MSSP
Ruvansk	Aggressor

Type

Synopsis

You have been enlisted as a contractor for HTBSS, a leading Managed Security Service Provider (MSSP) based in the bustling tech hub of the United States of Luminthia. The nation thrives on its interconnected systems, making it a prime target for cyber threats. Your mission is critical: ensure the confidentiality, integrity, and availability of these vital systems during the political elections round.

As a key player in this high-stakes environment, you'll join a diverse team of specialists, each assuming roles that leverage their unique backgrounds and skills. Together, you will navigate a series of escalating cyber incidents, testing your ability to respond under pressure.
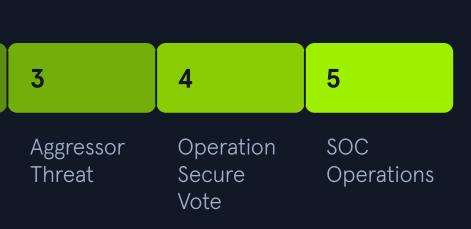

Key Phases

1	2	3	4	5
Election Monitoring	Crisis Support	Aggressor Threat	Operation Secure Vote	SOC Operations

Cybersecurity Objectives

Continuous Monitoring	**Timely Detection & Response**	**Tools Utilization & Host Management**
Use of advanced security tools and techniques to detect any potential security events or incidents, ensuring real-time situational awareness.	Deploy rapid response measures and coordinate with relevant stakeholders to prevent any disruption to election operations and services.	Maintain systems integrity by delivering regular updates, patch management, and ensure that all defensive measures are actively functioning.

Main Responsibilities

The scenario will stress-test process and procedures with live-fire adversary injects, focusing on the following crucial operations:

· Incident management
· Threat detection
· Response coordination
· Continuous improvement
· Reporting
· Regulatory compliance
